Eastleigh Borough Council TPO and CA Decisions

Date: 16.1.13

Application number: T/12/71832

Address of the trees: Netley Cliff, Victoria Road.

Request for works: Crown reduction

Comments:

This application has requested that a Holm Oak be reduced so as the view to the water is opened up. I feel that to allow this work would be both detrimental to the trees health and to the visual amenity that the tree provides.

There have been recent works at this site to reduce the canopy of Holm Oaks. This work was identified by T. Marsh in his site H&S survey.

The reduction of these Oaks was to maintain them due to cavities and to preserve them in their current area, rather then loose them all together.

I do not feel that reducing a tree to open up a view is following best arboricultural practice and therefore, I do not support this application.

Decision:

CONSENT WORKS **REFUSE WORKS** PART CONSENT/PART REFUSE
RAISE NO OBJECTION RAISE OBJECTION

Refuse permission.

Works are detrimental to the health and amenity of the tree and is not following best arboricultural practice.
