Comments:

Comments/ observations following site visit of 20/07/2015:

Group of old Ash coppice, likely pre-dating property. The trees are in fair condition, however the vigor is low for the species and the crowns appear thin. The old coppice stalls have various historic cavities that could lead to stem failure in time. These trees could effectivly be managed as coppices.

Consent to-
Recoppicing of Ash stems T1-T12 removing individual stems (at approx. 1-1.5m making individual wounds rather than 1 large wound) but retaining stumps to allow regrowth.
