Comments:

Comments/ observations following site visit of 27/05/2015:

1 x Lime - The tree appears outwardly healthy. It is a prominent tree that is viable from the road and for users of the restaurant. I am advised by a pest control professional that rat control shouldn't require the removal of the tree, he emphisied this with 'you don't remove houses every time they get infested'. I also contacted Fiona Willis as part of my investigation.
