Reason For Application:

To maintain the trees in a safe condition.

Comments:

T3, 5, 8, 9, 11, 14 and G10 are in poor condition and would not merrit a TPO if re assessed.
G12 (6 no. pines) are poorly formed due to historic management.
T1 polplar is growing into the adjacent trees, over the road and has overhead cables running through the canopy. Its amenity contribution would not be significantly reduced following the proposed works and the adjacent trees would benefit in the long term.
