KEY

- Trees to be removed
- Existing trees to be retained
- Proposed trees
- Proposed hedge and shrub planting
- Turf
- Gravel
- Acid grassland re-instated by re-using topsoil removed from site before construction and stored in 100L horticultural buckets with holes for drainage, covered with geo-textile membrane and stored within RPA of retained trees
- Interlocking retaining wall system with soil plant pockets or bags at 1m staggered intervals horizontally and 0.5m vertically (from 1m above ground)

NOTES
1) Foundations to dwellings to be designed to take account of the mature height of existing and proposed trees.
2) The soft landscape specification shall be in accordance with the First Wessex soft landscape specification.
3) Future service plans to take account of the tree positions.
4) All private gardens to be provided with compost bins, bird baths, bird tables and a bird box

rev B Retaining wall width reduced, acid grassland bank re-instated May 2011
rev A Some trees to eastern boundary removed Dec 2010
