Comments:

Comments/ observations following site visit of 31/07/2015:

Mature Oak - Visable from the road and is important for it's cohesion within the sylvan nature of the area. The Oak appears outwardly healthy. No Arboricultural evidence has been supplied to justify the need to reduce the trees canopy by such a significant amount. 30% is a vague term; is that volume or area and how do we measure it? The proposed works would have a detrimental effect on the trees health, aesthetics and longevity.

Decision:

Refuse
