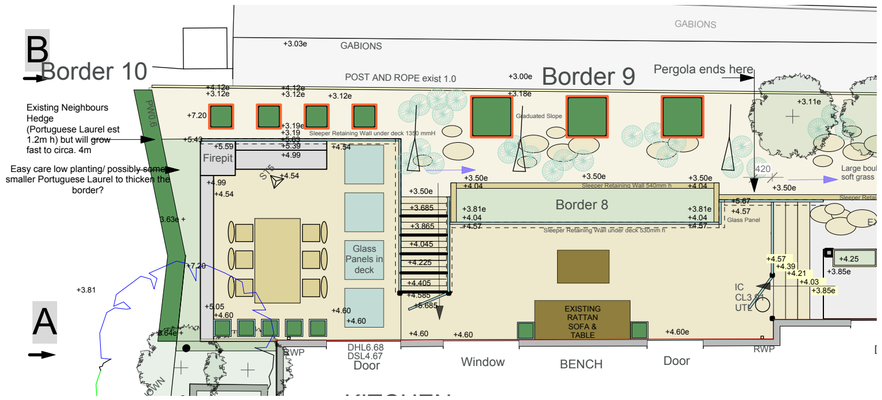
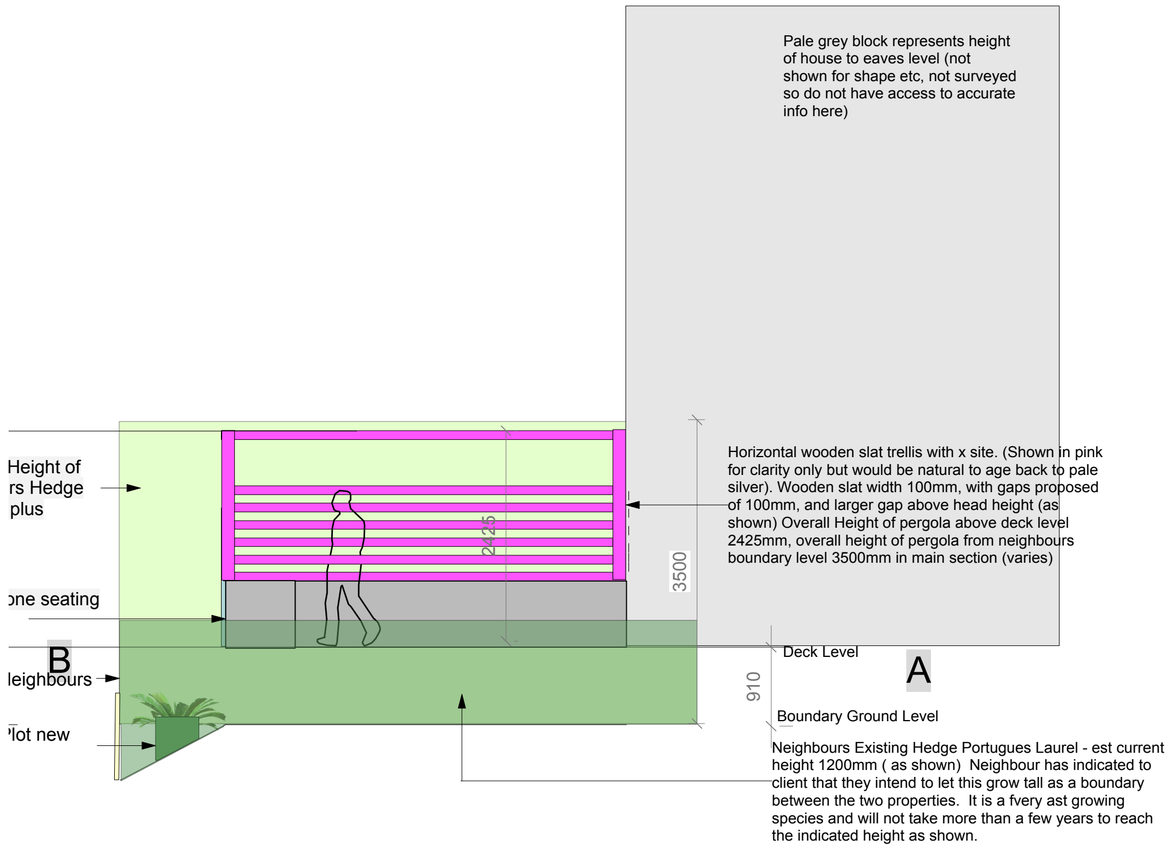
Parsons Plot

SCALE 1:200 @ A2

Note: Pergola removed from 2D Plan shown below . Exact positioning of Pergola is shown on another plan .





OPTION 1
Preferred option by client: Image above to show approximate look of Horizontal Slat Trellis. Our proposed Trellis would have larger gaps than the above shown.

OPTION 2
Image above to show alternative option of using Woven Oak Panels as a boundary for the Pergola area. (Fall back, not preferred route)

General Notes

1.This drawing is for Elevation reference only, for all detailed Levels refer to Presentation Plans, issued separately, However elevation is correct for levels.
2.Pergola: This elevation shows the approximate effect as seen from Myrtle Cottage. The hedge currently planted is estimated to currently be 1.2m high, Portuguese Laurel will grow to many metres high and the neighbour has indicated to our clietn that they plan to let this grow tall, which would then obscure any of the stone bench, and could also obscure the lower slatted trellis, and could be pruned at just above the pergola height, should the neighbour wish.
The lower slats are shown with spacing of 10mm, A gap of 10mm should not affect the neighbours privacy, and in due course once the hedge grows it will not be seen, but if planning prefer we could close up the gap completely or alternatively look at a Woven Oak Fence panel.

The back of the trellis (not shown on this elevation) which is adjacent to the house will have slats spaced at approximately 10mm spacing (this elevation does not affect the neighbour but assists the client with screening of the shed behind)
PLEASE NOTE PERGOLA IS SHOWN IN PINK PURELY FOR CLARITY, IT WILL BE NATURAL WOOD AS PREVIOUSLY STATED
3.Vegetations is purely indicative, and is not meant to suggest species, it is purely to show greenery.
4.REFER ALSO TO MAIN ELEVATION DRAWING TO SHOW ASPECT FROM S/W BOUNDARY (IE FROM THE WATER)
5.Planning application ref: C/12/70627
