11 Jockey Lane, Bishopstoke

# 3 Bedroom Bungalow
## with Proposed Loft Conversion, Double Garage & Driveway.

V1. 04.09.11
Ref: 11JL-Elevations-Loft-Ext
Scale: 1:100
Document Size: A3

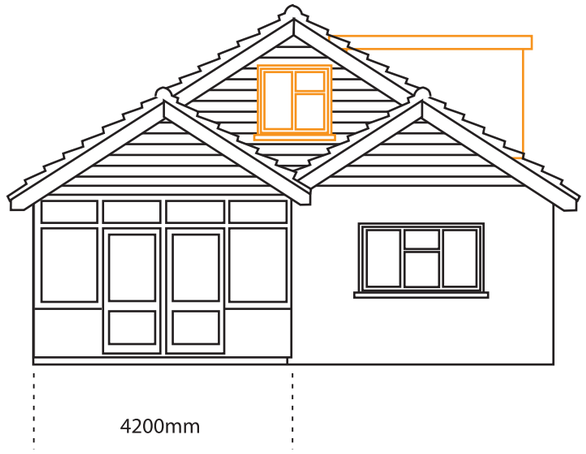
Working with the existing roof height and extending with a dormer out to the east side of the roof creates a good amount of usable floor space in the first floor.

Outwardly, the new features are comprised of the dormer itself, a pair of floor length doors and Juliet balcony guard to the front, single window to the rear elevation and three Velux windows on the western roof pitch allowing afternoon light into the first floor rooms.

The dormer would house three windows with the centre bathroom window obscure glazed.

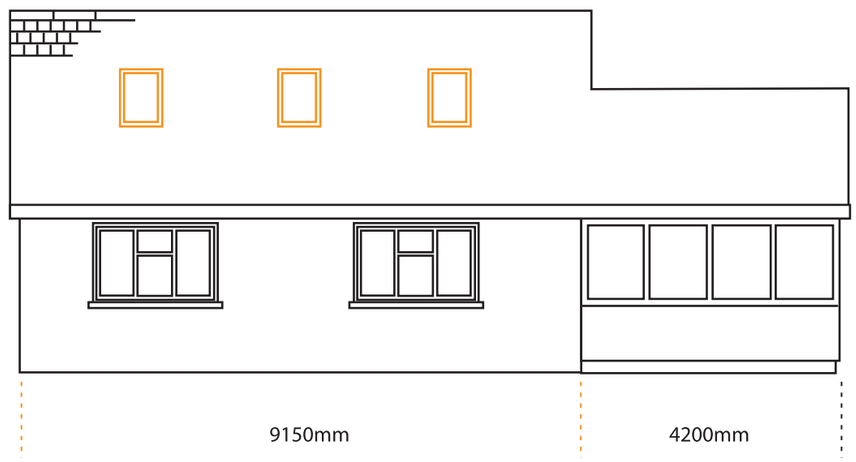
All materials and finishes would be in keeping with the existing building.

Rear Elevation (South)



Front Elevation (North)

Side Elevation (East)



Side Elevation (West)
