Description Of Tree Works.

The large Oak (T1) stands in the rear garden behind the patio. Beyond the lower level patio, there is a dividing wall with a rail fence on top. It is behind this fence that the tree stands on higher level.

The branches of the tree overhang the patio (as can be seen in the attached photos), this in turn causes the owners problems with pigeon defecation, smut and honey dew, not to mention the annual leaf litter.

The tree is generally in good health but would benefit from professional surgery work as none has been undertaken.

I would recommend carefully cutting back the branches overhanging the fence by no more than 2 metres to growth points.
Clean through the canopy removing all dead wood.
Remove the unsightly stubs and one small lower branch.
