Eastleigh Borough Council TPO and CA Decisions.

Date: 7th October 2013

Application number:
T/13/73245

Address of the trees:
9 Kinsbourne Rise, Thornhill

Application:
T1, Poplar. Reduction of lateral limbs by 2m where overhanging boundary.

Correspondence:
None received.

Comments:
The Poplar tree in question is a small mature specimen which stands on the northern boundary of the property, on land which does not appear to be owned or maintained either by EBC or HCC.

At the time of inspection, the Poplar was found to be in reasonable condition, with no evidence of defects or pathogens visible. The proposed pruning to alleviate encroachment appears to be reasonable at this time.

Decision:
Consent Granted:
Poplar tree standing on land to the north of the property:
Prune to remove overhanging branches by no more than 2.0 metres to alleviate encroachment.

Dead wood may be removed without the need for written consent from the Council.

Conditions:
The tree works hereby consented shall be completed within 2 years of the date of this permission and shall be carried out in accordance with the approved details and with BS3998:2010 Tree Works-Recommendations.
Reason: To preserve the special amenity value of the tree.

The landowners consent must be obtained to enter his land.
