

Planning Application:

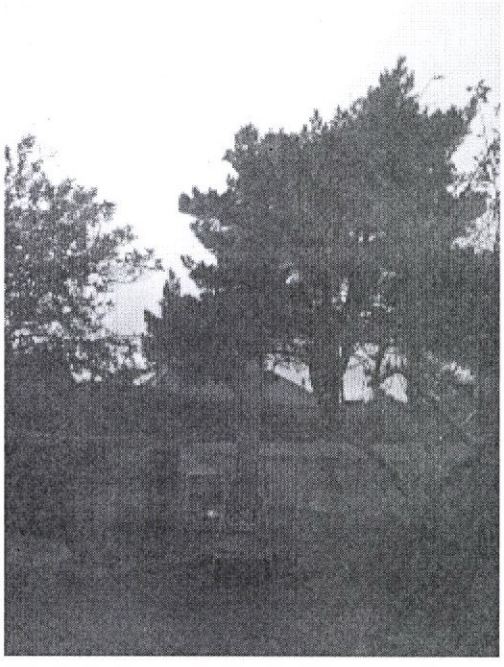

To allow the cutting back of branches that overhang 102 Chalvington Road from a tree located in the plot boundary of 100 Chalvington Road

Tree growth is just beginning to cross over our boundary fence (approx 1.0m). Permission is requested to cut this back on an annual / bi-annual basis as required to prevent substancial future growth affecting the enjoyment of our garden, which would otherwise be covered in pine needles as is the case with next door (98a).

View of the tree growth line beginning to intrude over our property boundary.

Wider view of the tree, planted too close to neighbouring property boundaries.

Visual impact of the situation next door 'enjoy' (shed roof shown), where the tree overhangs their property and has affected the enjoyment of their garden through excessive pine needle fall. This has killed off a large extent of their grass, and prevents plant growth below the canopy.
