The BELTON metal shed measuring 8' x 8' with double sliding doors to the front. An attractive building and the perfect size for most applications and storage, maintenance free, all that needs to be done is the occasional wash to keep it looking good.

Complete with a **15 year No Rust Perforation guarantee** this shed is truly **maintenance free** and offers completely worry free storage. Ideal for a number of uses and applications.

Dimensions of the 8' (2.55m) Gable Belton

Base Dimensions: 255 x 233cm
Roof Dimensions: 261 x 242cm
Ridge Height: 202.5cm
Eaves Height: 165cm
Door Opening: 110x159cm

The Belton Metal shed Features:

- Hot dipped Galvanised steel throughout
- Deep Roll Formed wall panels which provide exceptional strength
- Pad-Lockable Double doors, these are internally sliding on runners
- A strong entry and exit ramp across the full opening width of the door
- Fully ventilated with vents in both the front and rear apex
- Totally Maintenance Free
- Completely Rot and Rodent proof

Technical features:

- 15 Year Guarantee against rust perforating the structure
- Made from Pre-Painted Hot Dipped Galvanised Steel sheet of 0.25mm
- Zinc coating of 180g / square metre for the cladding with 1 coat epoxy primer and 1 coat modified polyester giving a tough external finish which will last for years and only require occasional washing
- Internally the panels are painted the same high standard but in a light grey finish
- Internally the strong framing is made from galvanised steel with a zinc coating of 275g / square meter

Optional Base Foundation:

To provide a quick and easy method of creating a base for your metal shed we offer a base foundation kit. In order to create this base first level the area. Lay a Damp Proof Membrane onto the ground. A DP membrane will ensure you do not have any condensation problems within your metal shed. The shed is then built and placed on the assembled foundation frame which is made from heavy duty "U" channel framing. Once complete the internal foundation frame is flooded with concrete. Once set this provides a solid, damp free base.

Colour Finish

Please note that whilst the picture accurately depicts the shed, colours do vary. The building is finished in Dark green with White Trim.

Installation

Tuin offers an installation service for all their metal sheds. This can be selected as an option below. The base must be fully prepared before the fitters arrival of either concrete or paving slabs and be flat and level with reasonable access.

Optional Hilti Set

Available as an option. This set includes a masonry bit of the correct size and allow you to securely attach the shed to a concrete or paving slab base.

Shed Image:

The standard BELTON 86 is extended by 2 module/s to result in the deeper models of 8' or 10'.

Delivery notice

Delivery is included in our prices for most areas of mainland UK, however there may be extra charges for Scotland, off shore islands and some remote areas of England and Wales. These areas are shown in red on the map below. Please enquire before ordering if this might apply to you.

Further support information can also be found by clicking on the "i" icon.
Delivery: 7 - 10 working days
