Date 16/11/2010

CooperVision SP4, Ensign Way, Hamble
Scheme of Works proposed to deal with dust during the construction period.
16 November 2010

Action is to be taken to minimise the generation of dust during the construction process.

The generation of dust is detrimental to the Employers manufacturing process and is an annoyance to the neighbouring residential properties.

The Contractors attention is drawn to the proximity of the neighbouring residential properties and the Employers manufacturing areas.

The measures taken to minimise the generation of dust shall include but not limited to the following:

1) All reasonable measures must be implemented to keep dust levels to a minimum.

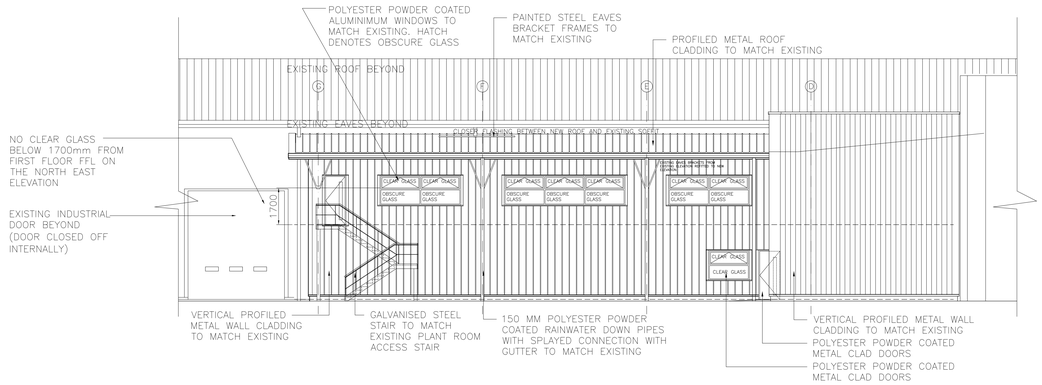

2) Various measures for suppression of dust shall include damping down of the dusty works.

3) All cutting equipment to have a fitted dust suppression system as standard.

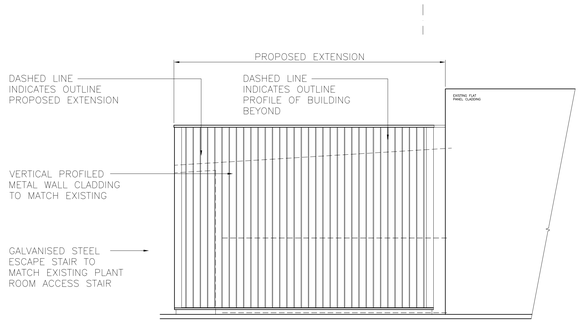

4) Roads are to be kept clean with a wet brush where required.

5) All Risk assessments and Methods statements submitted during the construction period by Contractors is to include statement on dust suppression methods to be used during the works.

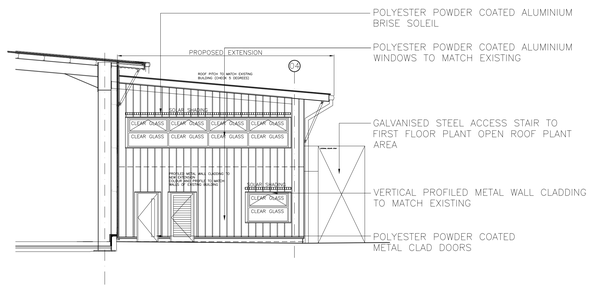

6) Where areas of the existing concrete slab are to be removed, concrete cutting equipment with dust collection and water dust suppression shall be used. The concrete is to be cut into slabs of a suitable size and lifted out and carried away. Concrete breakers should not be used for breaking out areas of concrete.
