

- Site Boundary (Outline Application)
- Site Boundary (First Residential Parcel)
- Potential Visibility
- Study Area

Source:
The Zone of Theoretical Visibility (ZTV) illustrates the extent to which the site at 15m is potentially visible within a 5km radius (1.6m high receptor). The ZTV has been modelled using GIS computer software (Global Mapper) and Ordnance Survey Terrain 5 data, and as such does not take into account built form or vegetation present within the landscape. Field verification is required to refine the accuracy of the ZTV.
