5. Description of the Proposal

Please describe details of the proposed development or works including any change of use.

If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.

During the winter, the high winds dislodged tiles from the right elevation, and we had to seek advice from a roofer who came and inspected and refitted the tiles. During the refit he commented that the existing fibreglass style insulation had broken down and was offering minimal, if any, insulation. Considering our options; we need to remove all the existing tiles and batons to remove the current insulation. Then reinsulate with 'Celotex' insulation which will be cut to size between the existing wood structure on both the left and right side of the property, as well as the dormer windows. For lower maintenance, we would like to reclad the sides with Durasid cladding, which has a core that is made from cellular PVC-U with a coextruded top layer. This would offer better installation with a greater energy saving. ([https://www.durasid.com/en/products/durasid original/](https://www.durasid.com/en/products/durasid%20original/) - Grey RAL 7035(93). During this process we will remove the existing bathroom window of square style and replace with a rectangular window. As my wife and I are getting older we would like a maintenance free as well as cost effective solution which we believe this type of cladding could offer.
