Description of Proposed Works

Please describe the proposed works

To convert existing integral garage into a partial living space, retaining up and over garage door to front of the property. Only external work to be carried out is to install a larger window to rear of property in place of current small window in rear of garage.

My property currently has two off road parking spaces, one being on the drive and one being in the garage. To ensure this garage conversion does not result in the loss of one off road parking space and a minimum of two off road parking spaces are maintained, I have extended the width of my driveway to enable to parking spaces.

Parking standard regulations state a parking space is 2.4 (m) wide and 4.8 (m) long. The area I have created exceeds 5 (m) wide and 5 (m) long and will comfortably fit two vehicles. We currently have two vehicle's in our household, at present we park one vehicle on the drive and the other on the road, as the garage is currently used for storage and not as a parking space. The driveway extension has now enabled us to park both vehicles on the drive, which has freed up a parking space on the road.

If Yes, please describe:

Space for car in garage to be lost. Existing driveway has already been widened to accommodate 2 vehicles. The driveway is 5.07m wide, which is wider than the width of 2 standard parking spaces (4.8m). The dropped kerb has been extended to accommodate the additional driveway width under HCC application ref:21554213. As such after the garage conversion work has been completed, there will be two parking spaces on the driveway, therefore maintaining the 2 spaces for the property size.
