Subject: RE: F/21/91037 & L/21/91048 - 1 Rope Walk

Dear Phil,

Many thanks for sending the attached through.

As per our earlier discussions, I think the Rootbridge system is a good design solution. I have looked at the installation they did in Chilbolton Avenue in Winchester and I have spoken to Ivan Gurdler (WCC) about it in the past. I think this could potentially work well if incorporated within this scheme.

With regard to the new planting, I think we could accommodate a new ornamental type tree in the position indicated on your plans and planted into the soil below the existing decking.

Given the restricted space available, you may wish to consider something small and ornamental, with a upright form, such as Amelanchier lamarckii 'Robin Hill'. Given the proximity of the new tree to the wall, I think you should also think about incorporating a tree root deflector (to funnel tree roots downwards and away from the wall and its footing).

Please get back to me if you need anything further.

K r
