Subject: PLANNING APPLICATION: F/22/93217:26 Satchell lane, Hamble
Date: 14 July 2022 20:31:23

Dear Andy Grandfield,

I have been unable to login to the Eastleigh borough Council website to submit my comments online, so I hope this email is forwarded to you.

Having looked at the plans for no 26, I do object to the full length window on the upper side (west) of the house. This will look straight into the window of my ground floor middle bedroom causing a loss of privacy.

The back of the house at the side is not "stepped in" on the west side to comply with the Crowsport conservation area guidelines. To protect the amenity of No.26, I am not permitted to build on the first floor level of my flat roof to the full width of my house (facing No.26) and am in fact only allowed on the flat roof to the east side of my building for "essential maintenance and repairs".

Unfortunately I will also lose the west view of the river Hamble from the upstairs master bathroom. If No.26 was also of Crowsport "stepped in" design, like my planning permission had to comply to, I would retain some of my existing view.

Many thanks,

Beverley Ollier
28 Satchell lane, Hamble, SO31 4HH
