Subject: Application No: PN/22/93378 - Address: Land on Corner of Belmont and Wiltshire Road, Chandler's Ford

Description: Proposed 5G telecoms installation: 15m street pole and 3 additional ancillary equipment cabinets and associated ancillary works.

Hi Alex

Thank you for consulting Pollution Control on this application.

The monopole locates away from occupied premises and based on experience, there may not be an adverse impact from electromagnetic radiation.

The applicant is required to check this however and the cumulative effect with other transceivers and has provided us with an assistant technician's working out or computer input data form.

Of course, it is necessary for a professional or responsible person to check this and make amended, as necessary. A certificate of compliance is required from that profession or responsible person having done the check and being satisfied regulations are complied with. Please ask the applicant for a statement of compliance signed by that person. There is no need to contact me again on this once this is supplied.

To add reason, it is my understanding the regulator checks compliance that is self-certified from time to time but not in every case.

Kind regards
Jon

Jon Pyke
