Hi Claire,

This application involves work to the roof, removal of a chimney and rear dormers. The site is in an area with many records of bats. The side of the building where the loft extension is proposed is next to a line of trees. Due to the complexity of this proposal, it would not be efficient for me to look at photos first. A preliminary bat roost assessment will be required. The ecologist must also recommend suitable biodiversity enhancements for this proposal.

Kind regards,

Lisa
