

M27 Street Views

(Source: Google Streetview)

Existing view of the site from the M27 (above) will be screened.

Extracts from the proposed landscape plan show:

1. New enhanced boundary planting.
2. New block buildings facing into the site, with planting up against their elevations and with part sedum roofs.
3. The site access road is set back from the M27 and will be screened by (1) existing and new planting along the site boundary; (2) fencing within and outside of the site next to the adjoining PRow; and (3) planting on the motorway embankment outside of the site (please see additional Google Streetviews below and please refer to DAS and Footpath 10 photographs and LVIA)
