

Ecology Response for H/22/93460 10 BENMORE GARDENS, CHANDLER'S FORD, EASTLEIGH,

SO53 1TT

Single storey side extension to extend the Garage forward by 1.5m

First floor side extension over garage.

Alex Stone

There are records of bats nearby and this proposal will affect the roof, however I don't see any potential bat roost features from the photo of the house on google maps.. Ramalley Copse SINC is located at the southern boundary.

Please could you add the following informative to the decision letter:

In the unlikely event of any bats being found during demolition or construction, all work must stop immediately, and Natural England must be informed. Additional information is available on the Bat Conservation Trust website at <https://www.bats.org.uk/advice/im-working-on-a-building-with-bats/ive-found-a-bat-during-works>.

Biodiversity enhancements are required. A built-in bat brick or swift brick might be appropriate in the new extension.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.

(<https://www.swiftconservation.org/Nestboxes%26Attraction.htm> )
