Description of Proposed Works, Impacts and Risks

Proposed works

Please describe the proposed development including details of any dwellinghouses and other works proposed

NONE. There are no proposed work and no works are necessary. This existing two bedroom flat was only changed from residential use to office use in July 2016 and has had no structural changes. This application is just for a simple change of use back to a residential flat.

Please provide details on the provision of adequate natural light in all habitable rooms of the dwellinghouses

The property is exactly the same layout as it was when it was residential previously. Each room has an external window.

What will be the net increase in dwellinghouses?

1

This figure should be the number of dwellinghouses proposed by the development that is additional to the number of dwellinghouses in the existing building prior to the development.

Impacts and risks

Please provide details of any transport and highways impacts and how these will be mitigated, particularly to ensure safe site access

Changing from an office to a residential dwelling will mean a reduction in use of local highways. No further likelihood of clients visiting or staff arriving. Just a reduced low impact of a single residential small flat.

Please provide details of any contamination risks and how these will be mitigated

There are no works or structural alterations required and so nothing will change and therefore no contamination risks.

Please provide details of any flooding risks and how these will be mitigated.

This property is within Flood Zone 1 and has no risk of flooding. It is a first floor flat. It is an existing structure which has previously been residential for many years more than the recent use as an office.

A flood risk assessment should accompany the application where the site:

- is in Flood Zones 2 or 3; or
- is in an area with critical drainage problems (such areas will have been notified to the Local Planning Authority by the Environment Agency).

[Check if your site location is in Flood Zone 2 or 3 online](#)

Check with your Local Planning Authority to see if your site is in an area with critical drainage problems.

Please provide details of the impacts of noise from any commercial premises on the intended occupiers of the new dwellinghouses and how these will be mitigated

It is only a new dwelling by virtue of it being created by the use being changed back to residential from an office. The same commercial premises are nearby which were there before July 2016 when it was a residential flat for many years. The shop below only opens part time and creates no noise.

If the building is located in a conservation area, and the development involves a change of use of the whole or part of the ground floor. Please provide details of the impacts that the change of use will have on the character or sustainability of the conservation area and how these will be mitigated

Not applicable. This property is not in a conservation area.

If the building is located in an area currently in use for general or heavy industry, waste management, storage and distribution, or a mix of such uses.

Please provide details of the impacts on intended occupiers of the development of the introduction of residential use in the area and how these will be mitigated

Not applicable. This property is not located in an area currently in use for general or heavy industry, waste management, storage and distribution, or a mix of such uses.

If the proposal involves the loss of services provided by a registered nursery, or a health centre. Please provide details of the impacts on the local provision of the type of services lost and how these will be mitigated

Not applicable. This proposal does not involve the loss of services provided by a registered nursery, or a health centre.
