

Ecology response for H/22/93620 71 SWAYTHLING ROAD, WEST END, SOUTHAMPTON, SO30 3AG

Single storey rear extension.

Alex Stone

5/10/22

There are records of bats very close to this property, however the house does not have any potential bat roost features on the lower level.

Biodiversity enhancement is required. A bat box or a swift nest box may be appropriate for this property.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk › our-work › putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
