

The above plan shows a birds eye view of our property along with the tree in question.

As you can see the red line shows the outline of our house along with the fence line. As you can see from the blue line (tree) it covers a large part of our garden.

Below are a number of pictures showing the size of the tree and the amount it hands across into our garden. I have also included the damage it is causing to our lawn with the debris and acorns. Also, dead wood is falling on our roof.
