Claire,

Another box dormer to ruin the landscape!

This proposal introduces an alien element into the existing vocabulary of the building and those around it - a penny-pinching solution which does nothing to maintain or enhance the locale. This dormer will be visible from the public domain so should follow the existing architectural vocabulary of the building.

The new dormer needs a pitched roof consisting of either a single ridge with a gable or hip as the others, or two ridges of a similar size to the other dormer windows with hips and a valley between them.

Holding objection.

Regards,

Tim.
