Contents

- 1** Introduction
- 2** Site Description
- 3** Planning Policy Context
- 4** The Proposal
- 5** Conclusion

1 Introduction

- 1.1** Inspired Partnership Limited has been instructed by Purpose Social Homes Limited to submit a planning application to Eastleigh Borough Council, for the internal alterations of a single dwelling to provide supported living for two residents with support staff at The Bays, Upper Northam Drive, hedge End, Southampton SO30 4BG
- 1.2** The proposed residential accommodation will provide a living environment suitable for residents with learning and physical disabilities. The support for the residents is provided by Westmoreland Housing, a health and social care landlord, and Southampton City Council who will fund and procure/provide a care provider to provide onsite care and support.
- 1.3** The following documents are included with the application to illustrate the proposed development:
- Planning Statement
 - Application Form
 - Application Fee
 - CIL – Form 1
 - Notice Under Article 13 of Application for Planning Permission
 - Location Plan 1:1250
 - Block Site Plan 1:200
 - Existing Plans and Elevations 1:100
 - Proposed Plans and Elevations 1:100
 - Letter of support from Carrie-Ann Mills, the Commissioning Manager (Learning Disabilities) for Southampton City Clinical Commissioning Group (Integrated Commissioning Unit).

2 Site Description

2.1 Background, Setting and Landscape

Hedge End is a town and civil parish in Hampshire within the Borough of Eastleigh and is located approximately 4 miles east of the City of Southampton. Hedge End is generally classed as part of the Southampton urban area.

The Application site is within a highly sustainable area. Hedge End offers a range of amenities including shopping and supermarkets, post office, medical centre, hair dressers, schools and fitness facilities. There are regular transport links by bus, train and easy access to the local road network with the M27 Junction 7 nearby.

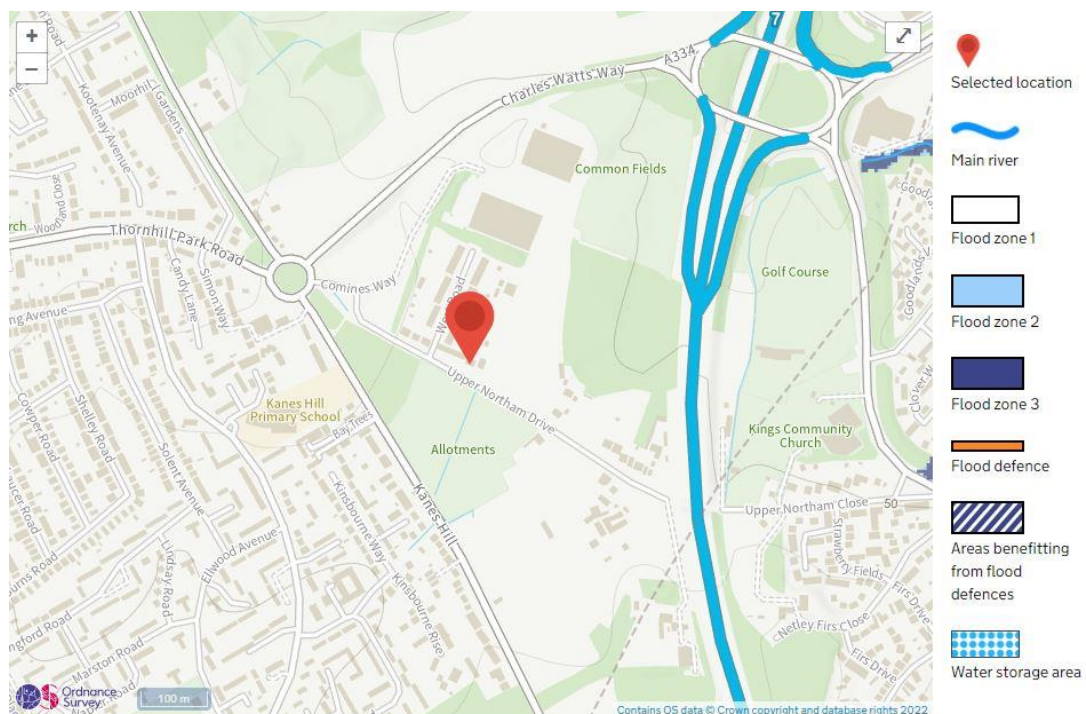

2.2 Character of Buildings and Spaces

The Bays is a detached chalet bungalow that consists of a concrete, pitched tiled roof over facing brick and rendered masonry external walls with PVCu external windows and doors, PVCu fascias, gutters and downpipes.

Existing accommodation comprises an entrance hall, kitchen/breakfast, utility, dining, living, two bedrooms, bathroom, office/storage. In addition, there is a bedroom and ensuite shower room located within the roof space with a stair to the ground floor hall.

2.3 Flood Map

According to the Government's Flood Map for Planning Service the site is located within Flood Zone 1, which has a low probability of flooding from rivers and the sea.

2.3 Photographs of Existing Dwelling

3 Planning Policy Context

3.1 Planning Policy Context

Relevant planning policies that apply to this planning application are:

- The National Planning Policy Framework (NPPF)
- Eastleigh Borough Council Local Plan 2016 – 2036

The National Planning Policy Framework (NPPF)

This sets out the Government's planning policies for England and how these are expected to be applied. It provides a framework within which local people and accountable councils can produce their distinctive local and neighbourhood plans and has an emphasis on a positive stance towards 'sustainable' developments, which is positive growth.

Eastleigh Borough Council Local Plan 2016-2036

This sets out the policies and plans to guide future development to 2036. It reflects the Council's Strategy and the Borough Council's corporate priorities for a green borough, a healthy community and a prosperous place. There are currently no adopted neighbourhood plans in the Borough.

3.2 Designations

The Application site does not lie within a Conservation Area and the building is not protected by listing. There are no Tree Preservation Orders (TPO's) on or adjoining the Application Site.

3.3 Planning History

No planning records have been found for this property on Eastleigh Borough Council's online planning register.

4 The Proposal

4.1 Design Objective and Principles

The objective is to re-organise the internal layout of the existing bungalow in order to provide supported living accommodation for two residents with their support staff. Supported living is preferred over residential care settings due to the greater tenancy rights afforded to an individual through their tenancy agreements.

The property's services, heating, lighting and small power will be upgraded, to provide more energy efficient systems to benefit the residents, with the installation of photovoltaic panels on the roof. Gutters and Downpipes will be replaced with new to match existing and general internal finishes and fittings will be replaced.

Site and Building Layout

Each resident will have a separate entrance to their accommodation with bedroom, bathroom, living/sensory areas and kitchen to allow residents to live as independently as possible with care provided. The support staff's accommodation is at first floor level, has a separate entrance and has direct internal access into each unit.

Massing and Materials

The footprint, massing and external materials remain unchanged. New doors and windows will match the existing PVCu doors and windows.

Access

The site is within close proximity to bus services and within walking distance of a range of local facilities. Access from the highway is unaltered and the level of existing on-site parking is adequate primarily for support staff and occasional visitors. The building has a curtilage with existing refuse/recycling areas that are adequate for two residents. The site is generally level and the residents' needs for access have been appropriately considered and addressed as part of the proposal.

5 Conclusion

- 5.1** In summary the application proposal is for the internal alterations of an existing dwelling to provide supported living for two residents where care is provided.

The scheme will provide high quality, specialised accommodation to meet the needs of adults with learning disabilities that have complex care needs, autism and/or challenging behaviours or other health and social care needs.

The proposed bespoke high-quality community based independent housing for residents with disabilities will support Southampton City Council in delivering more effective and efficient care for vulnerable adults.

We consider that the proposed development accords with the strategic objectives and relevant policies of the development plan and is consistent with the NPPF and the PPG. This application is therefore in accordance with the development plan.
