

Ecology response for H/22/94027 2 MOORGREEN ROAD, WEST END, SOUTHAMPTON, SO30 3EG

Proposed front porch, elevational alterations side dormers and part loft conversion (Part PD)

Alex Stone

16/11/22

There are records of bats very close to this property. From the photos of the house on Google maps I don't see any potential bat roost features.

Please could you add the following informative to the decision notice:

In the unlikely event of any bats being found during demolition or construction, all work must stop immediately, and Natural England must be informed. Additional information is available on the Bat Conservation Trust website at <https://www.bats.org.uk/advice/im-working-on-a-building-with-bats/ive-found-a-bat-during-works>.

Biodiversity enhancements are required. Depending on the available elevations a bat box or a swift nest box might be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
