

Ecology response for H/22/94001 3 WHALESMEAD ROAD, BISHOPSTOKE, EASTLEIGH, SO50 8HD

Loft conversion with rear dormer, side velux windows and single storey side and rear extension.

Dorothy Hei-Tung-Hoh

16/11/22

There are records of bats very close to this property. From the photos of the house on Google maps I don't see any potential bat roost features.

Please could you add the following informative to the decision notice:

In the unlikely event of any bats being found during demolition or construction, all work must stop immediately, and Natural England must be informed. Additional information is available on the Bat Conservation Trust website at <https://www.bats.org.uk/advice/im-working-on-a-building-with-bats/ive-found-a-bat-during-works>.

Biodiversity enhancements are required. Depending on the available elevations a bat box might be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk › our-work › putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))
