11th November 2022

Reference: 14 Kings Close, Chandlers Ford, SO53 2FF

Chase Ecology carried out a walkover of the site known as 14 Kings Close, Chandlers Ford, SO53 2FF on the 3rd November 2022 to determine any changes to the structure which was previously assessed in 2021.

During the site visit, all external features of the property were observed along with access within the roof void spaces where no evidence from bats or nesting birds were noted.

From viewing the previous report from 2018, we can see no change in value to bats throughout the structure or any additional roosting features.

Images below taken during a site visit on the 3rd November 2022

If any further clarification is required for this site, then please feel free to contact me directly on the below details.

Yours Sincerely

Garry Smith
