

Additional Ecology response H/22/93692 14 KINGS CLOSE, CHANDLER'S FORD, EASTLEIGH, SO53 2FF

Loft conversion, rear extension, and alteration to fenestration

Alex Stone

14/11/22

I have reviewed the site walkover letter by Chase Ecology based on a site visit on 3<sup>rd</sup> November 2022. There was no change in value to bats and no additional roosting features have developed since the last report in 2018.

Please could you add the following informative to the decision notice:

In the unlikely event of any bats being found during demolition or construction, all work must stop immediately, and Natural England must be informed. Additional information is available on the Bat Conservation Trust website at <https://www.bats.org.uk/advice/im-working-on-a-building-with-bats/ive-found-a-bat-during-works>.

The biodiversity enhancements recommended in the previous response are still appropriate.
