

Ecology response for H/22/94051 BADGER COURT, BADGER CLOSE, BISHOPSTOKE SO50 8JY

Enclose one existing balcony on first floor to south elevation, with flat roof.

Enclose one existing balcony on second floor to southwest elevation, with flat roof

Rachael Morris

22/11/22

There are records of bats, swifts and hedgehogs very close to this site. I have reviewed the photos of the south and southwest elevations on Google maps. Although there is cladding in this area, it appears to be in good condition with no potential bat roost features.

Please could you add the following informative to the decision notice:

In the unlikely event of any bats being found during demolition or construction, all work must stop immediately, and Natural England must be informed. Additional information is available on the Bat Conservation Trust website at <https://www.bats.org.uk/advice/im-working-on-a-building-with-bats/ive-found-a-bat-during-works>.

Biodiversity enhancements will be required. A bat box or a swift nest box might be appropriate on this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk › our-work › putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
