

Ecology response for H/22/94041 CHERRY TREES, SCHOOL LANE, HAMBLE-LE-RICE,
SOUTHAMPTON, SO31 4JD

Demolition of the existing front porch. Two storey rear extension. Single storey front extension.
Alterations to fenestrations

Claire Campbell-Best

28/11/22

There are records of bats, hedgehogs, and swifts very near this site. The proposals involve extensive works to the roof. A preliminary ecological assessment will be required including an internal inspection of the loft spaces.

Biodiversity enhancements will be required. Built-in bat bricks/boxes and swift bricks/nest boxes might be appropriate enhancements.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
