

Ecology response for H/22/94067 1 HUNT AVENUE, NETLEY ABBEY, SOUTHAMPTON, SO31 5BD

Two storey front/side extension. Single storey rear extension.

Alex Webb

5/12/22

There are several records of bats very close to this property and the proposed work will affect the roof. The front and side of the house are visible on photos on Google maps, and the roof appears to be in very good condition with no obvious potential bat roost features.

Please could you add the following informative to the decision notice:

In the unlikely event of any bats being found during demolition or construction, all work must stop immediately, and Natural England must be informed. Additional information is available on the Bat Conservation Trust website at <https://www.bats.org.uk/advice/im-working-on-a-building-with-bats/ive-found-a-bat-during-works>.

Biodiversity enhancements will be required. A bat brick/box and a swift brick/ nest box might be good enhancements for this property.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
