

The diagram illustrates three types of landscape paving, each with a corresponding cross-section and a plan view. The cross-sections show the layers of the paving and the underlying ground. The plan views show the layout of the paving and the location of the manholes.

- Grass/Soft landscape:** The cross-section shows a layer of grass/soft landscape on top of a permeable layer, which is on top of a non-permeable layer. The plan view shows a rectangular area with a manhole in the center.
- Permeable driveway:** The cross-section shows a layer of permeable driveway on top of a non-permeable layer. The plan view shows a rectangular area with a manhole in the center.
- Terrace/Patio:** The cross-section shows a layer of terrace/patio on top of a non-permeable layer. The plan view shows a rectangular area with a manhole in the center.

INDICATIVE

—IMPROVED PARKING/TURNING. ALTHOUGH BELOW NEW STANDARDS THE IMPROVEMENT WOULD REMOVE 2 CARS FROM PARKING ON THE ROAD AND ENABLE OCCUPANTS TO LEAVE IN FORWARD GEAR

—IMPROVED VISIBILITY SPLAY

—REPLANTED FLOWER BED/
HEDGE TO RETAIN GREEN
FRONTAGE
