

Mountbatten Hospice, Botley Road, West End, Hampshire, SO30 3JB

Design & Access Statement

Parking

The current parking on site is heavily congested with insufficient parking spaces available for the staff and visitor levels experienced on site.

Cars regularly are double parked, parked on footpaths and grass areas due to the shortfall. All double parking has to be recorded in the reception in order that the drivers can be contacted to relocate vehicles should they be blocking other drives in and this takes them away from their work activities.

The proposed increase in parking spaces will allow a safer parking regime to be adhered to and the allocation of some dedicated parking spaces for visitors.

This will also free up the footpaths and grass areas for their intended purpose and overall reduced congestion on the site.

Log Cabin

The log cabin is to provide a quiet space / meeting area away from the main operational buildings and be located within the landscaped area.

It was felt that the this location was best suited would allow the building to be kept separate from the main day to day activities of the main hospice.

Although it will be infrequently used, it will be a welcome space that will allow activities / meetings to be held for a variety of uses.
