Subject: Application No: PN/22/94405 - Address: Grass Verge to Duke Road near junction with Paxton Close

Description: The installation of an 18-metre high slim-line monopole, supporting 6 no. antennas with 1 no. wraparound equipment cabinet at the base, 2 no. equipment cabinets, 1 no. electric meter cabinet, and ancillary development thereto, including the installation of a GPS module

Hi Rachel

Thank you for consulting Pollution Control for observations including the signed ICNIRP Declaration by Clarke Telcom Ltd (reference ELH25447 dated 9 December 2022), which we confirm we have seen.

We assume there will be no audible noise from supporting equipment (the boxes to be located at the base of the monopole - do not contain fans, motors etc ?). Please would you ask the applicant for clarification on this and ask will there be aeolian noise audible at the nearby dwelling during windy weather ? The pole would be 18m high and poses obstacle to wind flow inducing turbulence and effects which can manifest as audible noise.

We see the proposed installation is close to dwellings and there is opportunity to increase the separation distance. A location closer to Duke Road would also appear to make future maintenance easier for the operator.

We trust this is clear and helpful. Let me know if you have a question.

Kind regards

Jonathan Pyke
