Subject: Re: Planning Application F/22/92186

Hi Rebecca,

The floor levels of the container will be approximately 100mm higher than the current ground level.

The highest level ever recorded at the Tide at Woolston is 2.88m, reached on Monday 10th March 2008 at 12:15pm.

reference

<https://riverlevels.uk/itchen-woolston-tidal>

I've also attached the water levels from the area using reference below, which shows the land being 4m above sea level.

<https://www.floodmap.net>

If you need any further information please do let me know.

Best Regards,

Nasir Ali BA (Hons)
