Re : Planning Application F/22/94078
Droves End, 49 The Drove, SO30 2EF

22.12.22

Dear Sirs,

My objection, though more of an observation towards the planning process, is that the driveway into No. 49 is very narrow, bendy and difficult to negotiate - when either reversing in or reversing out, and if a couple of other cars are parked at 49, there seems to be little room to manoeuvre. Thus faint hearted visitors have, in the past, parked in the turning circle outside my house, as many as three cars at a time. When this happens other road users, and it is very narrow at our end of The Drove, need to use the turning circle - and cannot because of parked cars, so they use my driveway instead which, frankly I find very annoying.

When cars are parked in the turning circle residents from the three houses behind 45, 47 and 49 have to manoeuvre with great care as they leave their private drive to the right of my property.

I imagine that persons in need of supported living will create much more vehicular coming and going, potentially of larger vehicles and day time staff and visitors, thus if nothing is done, the turning circle will become a free car park.

Yours faithfully,

[REDACTED]

Andrea Scott
