

CONSTRUCTION ENVIRONMENT MANAGEMENT PLAN

WATERS EDGE, LANDS END ROAD, OLD BURSLEDON SO31 8DN

Overview

Construction of an in ground swimming pool with terrace and pump house

General Communication

[REDACTED]

Contractor MGB Design and Build

[REDACTED]

Environment

Spoil removed from ground dig to be reused to build up level of lawn to allow for new lawn to be laid.

Dust Suppression

During excavations spoil to be sprayed with water to prevent wind pick up. For any stone cutting a screened area to be erected and water sprayed to prevent dust drifting.

Work Hours

Monday to Saturday 08.00 to 17.00

Excavation Protection

A timber escape ramp to be placed in any excavations overnight until the pool cover is installed.

All pipework to be temporarily plugged/ capped when left unattended.

Drainage

If draining is required the waste water will be pumped to existing drainage system.

No chemicals will be used to clean pool water. Filtration will be by UV light to prevent any chemicals entering Hamble River.

Waste Management

Waste to be appropriately sorted, recycled and disposed of. No bonfires to be had on site.
