Existing Plans & Elevations The Bays.pdf; Proposed Plans Elevations The Bays.pdf

Thank you for sending this through, can you confirm the decision will be delayed until neighbours have the required 21 day consultation period from availability of the proposed plans, I will forward these to them.

I do have a lot of concerns based on the change of dwelling use, this is a residential area, and we already have a lot of traffic concerns with the lorry park at the end of the road which makes this a quiet road with enormous lorries speeding down here which makes it quite dangerous.

We also already have a supported living house in west road which backs onto my garden and causes a lot of issues, 4 times I have had men from this property climb fences to get into my garden at night, we also have a lot of noise especially arguing and the alarms going off at night often throughout the night plus constant shouting during the summer when they use the garden. So I do not think this is correct I will be surrounded by properties for supported living, I have lived here over 20 years and this will effect my property by reducing the value due to the possible nuisance factor this will bring if the type of dwelling is changed. This property is a long way from transport and shops with the only option to use a car to get around so I am amazed this is even considered as a suitable place for supported living. This needs to be rejected and a more suitable property found for this.

Thank you
