I support the application for the proposed loft conversion at 27 Hazel Close. I live next door to the site and the property is set slightly forward than ours and as such, the dormer windows to the rear will have minimal impact on our property. In addition, the site is also set lower than ours so any potential impact of overlooking will also be minimal.

The three velux roof lights to the front elevation will not cause any significant detrimental impact to the visual amenity of the area, the scale of the dormer windows to the rear elevation is not imposing and I do not believe that there would be any unacceptable overlooking should this application be permitted.
