

Trees Consultation Response
Received 09/02/2023

H/23/94514 - 95 PARK ROAD, CHANDLER'S FORD

Whilst there is a significant tree, subject to a TPO, close to the fence and car port, the new car port replaces an existing one and appears to use the same slab. Therefore, there would be very little impact on the tree. The same would be true of the replacement fence.

Therefore, we raise no arboricultural objection to the proposed retention of the fence and car port.
