

Eastleigh Borough Council Tree Preservation Order and Conservation Area Assessment Form

Application Number	T/23/94520					
Surveyor	SK					
Address	Land adjacent to 27 Cleverley Rise, Bursledon, Southampton, SO31 8LL					
Proposed work	1 no. Ash (T12)- Tree in advance stages of Ash Dieback. Fell to ground level to mitigate risk of failure. 1 no. English Oak (T13) - Crown raise to 3 metres.					
Assessment Date	10/02/23					
Officer comments	Site accessible and trees found without problem. T12 Ash tree is next to the spine road and is collapsing. Little live canopy remains, and it is heavily colonised with ivy. It is of some age and has features that in another setting would be desirable for habitat retention in this location it is possible, but the residents might consider it an eyesore, though it is in a fenced-off area.					
Decision	Consent	Refuse	Part consent/ Part refuse	Withdrawn / Invalid	Conservation Area	
					Raise no objection	TPO
	X					
Decision notice	CONSENT: 1 no. Ash (T12)- Tree in advance stages of Ash Dieback. Fell – see note about habitat retention. 1 no. English Oak (T13) - Crown raise to 3 metres.					
Conditions	Standard					
Notes to applicant	If possible and practical, leaving T12 ash as a high stump (1-2m would probably be safe in the longer term here) and would be good for ecology. An application of a systemic herbicide (e.g., Ecoplugs™ or similar) will stop regrowth which might become problematic					
Parish comments	None
