

Ecology response for F/23/94554 BOYATT WOOD SURGERY, BOYATT WOOD CENTRE,
SHAKESPEARE ROAD, EASTLEIGH, SO50 4QP

Installation of a lift

Alex Webb

20/3/23

There are records of bats and swifts very close to this site and the proposal will require works to the roof. From the photos available on Google Maps, I don't see any potential bat roost features which would be affected by the proposal.

Please could you add the following informative to the decision notice:

In the unlikely event of any bats being found during demolition or construction, all work must stop immediately, and Natural England must be informed. Additional information is available on the Bat Conservation Trust website at <https://www.bats.org.uk/advice/im-working-on-a-building-with-bats/ive-found-a-bat-during-works>.

Biodiversity enhancements will be required. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
