

Ecology response for H 23 94504 28 SPRING CLOSE, FAIR OAK, EASTLEIGH, SO50 7BB

Two storey side extensions

Rachael Morris

20/3/23

There are records of slow worms and bats near this property and mature trees on site which could provide habitat for nesting birds and roosting bats. It is not possible to see all the house from the photos on Google maps. To determine whether a survey is required I need to review photos of the house and garden. This should include all areas of the roof, fascia, soffits and areas around the windows which might be impacted by the proposals.

Biodiversity enhancements will be required. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk > our-work > putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
