

H/23/94728 – Arran Lodge, Hill Place, Bursledon, SO31 8DX.

Context.

One of the six houses built just after the turn of the century between the roads of Hill Place and Church Lane, it backs onto the extended graveyard of St. Leonard's parish church (listed Grade II*) which lies to the north of the church.

The property is separated from the church grounds to its south by mature hedging and trees, as indeed is the house from Hill Place to a certain extent.

The Proposal.

The installation of solar panels on the east, west and south elevation roof slopes. Those to the east and south will most probably not be noticed from the public realm but the higher two on the west elevation are quite likely to be.

Conclusion.

In view of the likelihood of the two higher panels on the west elevation being seen from the public realm, I have a holding objection which could be resolved by relocating them to one or both of the other elevations with solar panels on

16.03.2023.
