

Ecology response for H/23/94619 11 Hocombe Drive, Chandler's Ford, Eastleigh SO53 5QE

Garage conversion, first floor rear extension over the existing ground extension and alteration to fenestrations

Claire Campbell-Best

23/5/23

There are numerous records of bats in the immediate vicinity of this property and there are hanging tiles on the front elevation. The proposed works will not impact the front elevation so a bat survey will not be required.

Please could you add the following informative to the decision notice:

In the unlikely event of any bats being found during demolition or construction, all work must stop immediately, and Natural England must be called. Additional information is available on the Bat Conservation Trust website at <https://www.bats.org.uk/advice/im-working-on-a-building-with-bats/ive-found-a-bat-during-works>.

Biodiversity enhancements will be required. A bat box and a swift brick may be appropriate for this building, but the bat box must not be located above the lantern window in the roof below.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
