Hi Rebecca

I had now had the opportunity to look into the amendment drawings and the proposal has positively evolved to address concerns raised on my previous comment in terms of the potential impact on the surrounding area of Block D bulk and mass, the overall design and external appearance, as well as, the need to demonstrate that the proposal is using high quality materials and detailing.

I have no further objections.

Materials detail, including samples, can be conditioned provided that these follow the details set out in the Design and Access Statement and subject to case officer agreement.

I hope these comments are of help.

Kind regards
Marta
