

Planning Application PN/22/93378
Land on Corner of Belmont and Wiltshire Road, Chandler's Ford

Representee	Address	Comments
Molly Woods	26 WILTSHIRE ROAD CHANDLER'S FORD EASTLEIGH SO53 3EZ	It uses a ridiculous amount of electricity, the health problems that are associated with it, doesn't meet required boundary from mast to houses. Bad for the environment. Major objections to it.
Carol Rice	28 WILTSHIRE ROAD CHANDLER'S FORD EASTLEIGH SO53 3EZ	Detrimental to health and wildlife
Matthew Pettie	63 BELMONT ROAD CHANDLER'S FORD EASTLEIGH SO53 3FD	I don't want this eyesore opposite the front of my house, I want to buy my house but will not do so if this is built, there are plenty of local open spaces where this thing could go like the park area on cox row or even that massive open area of Fleming park, these things can cause health issues and are no good for wildlife either, so please don't allow this monstrosity to be build in the middle of a housing estate.
Emma Large	8 WILTSHIRE ROAD CHANDLER'S FORD EASTLEIGH SO53 3EZ	Too close to homes, it should be in a field. Didn't think you were allowed to place a 15m tower that close to a home boundary, ugly sight, danger to wildlife, on a corner of a road! What are you thinking! No! No! No!
Antonia Ling	56 BELMONT ROAD CHANDLER'S FORD EASTLEIGH SO53 3FE	I live on Belmont road and I object massively to this 5g tower being put up. Not only are you ignoring the health issues surrounding these towers you clearly have no care for the residence that live here. I suggest you research the negative impact 5g towers have on our health and our wildlife before you erect one a stones throw away from where my children and I live.
Carly Pettie	63 BELMONT ROAD CHANDLER'S FORD EASTLEIGH SO53 3FD	Both my husband and I have had early treatment for cancer and I have a daughter with a life threatening illness. I do not believe that a built up residential area is the best place for one of these masts. It is dangerous and we don't want it in this area. There is a childrens park right round the corner. Please move it and put it somewhere less built up. We have all read the report that the Italian courts affirmed tumour risks. I OBJECT MASSIVELY TO THIS. I OBJECT ON BEHALF OF EVERY CHILD WHO CAN NOT OBJECT TO THIS, FOR EVERY CHILD WHO LIVES ROUND HERE AND WILL BE EFFECTED BY IT, I OBJECT ON BEHALF OF EVERY CHILDS HEALTH.
Ingemar Demulder	30A BELMONT ROAD CHANDLER'S FORD EASTLEIGH SO53 3EW	I request to obtain full ICNIRP drawings and site specific radio frequency plans so that the exclusion zones can be understood and to comply with legal obligations. We believe the ICNIRP advise is wrong and there should be advice coming from independent scientists. Numerous recent scientific publications have shown that electro-magnetic radiation affects living organisms at levels well below most international and national guidelines. Proven effects include increased cancer risk, cellular stress, increase in harmful free radicals, genetic damages, structural and functional changes of the reproductive system, learning and memory deficits, neurological disorders, and negative impacts on general well-being in humans. Damage goes well beyond the human race, as there is growing evidence of harmful effects to both plants and animals. The deployment on this scale of pulsed microwave radiation is reckless. We are becoming increasingly alarmed as we learn of the serious implications of the 5G roll-out: to our own health, the environment and all

		biological life. No one wants a mast emitting high levels of radiation outside their home, their child's school or their place of work. The 'benefits' claimed by the telecoms industry come at a very high price. 5G radiation will be sent from advanced antennas, in phased arrays, that transmit microwaves in narrow beams, a technology originally developed for military purposes. This will massively increase the exposure to radiation from those beams. Those beams will be nearly everywhere. The wireless telecoms industry intend to outfit nearly every lamp post or utility post around the country with wireless small cell antennas beaming hazardous radiation next to, or into, our homes, schools, work places and everywhere, 24/7 as well as intensifying 4G throughout the countryside.
Steve Gurd	54 BELMONT ROAD CHANDLER'S FORD EASTLEIGH SO53 3FE	Medical evidence shows the danger these 5G masts are to humans (especially children) and the damage to the environment caused by them. No responsible council should even consider erecting such a dangerous piece of equipment in a residential area such as Wiltshire and Belmont Road. Are you going to put your rate payers (the people who voted you in to look after their interests) first or are you going to put big businesses first?
Leslie Sharpe	31 BELMONT ROAD CHANDLER'S FORD EASTLEIGH SO53 3EU	I cannot understand why this development is in a built up area close to dwellings when the motorway provides land along it side which could be used or Fleming park lane which has no dwellings on it. The mast could be disguised as a tree as they are in the new forest. Residents are concerned about the possible health implications and as a house owner I am concerned about the view and effect on house prices in the area.
Corrine Alford	5 BELMONT ROAD CHANDLER'S FORD EASTLEIGH SO53 3EU	We really object to this mast. For one it's an eyesore and secondly it has a negative effect on the environment. We feel it isn't necessary.
Daniel Brown	19 COX ROW CHANDLER'S FORD EASTLEIGH SO53 3EY	Dangerous/health hazard
Elaine Byng	40 BELMONT ROAD CHANDLER'S FORD EASTLEIGH SO53 3FE	I strongly Object to this 5G mast right next to our house. I have a medically vulnerable child. Who has a complex heart condition & Autism. My Son in his short life has had life saving open heart & lung surgery. He will need further surgery as he grows. He has ongoing needs & has to be closely monitored. He had a device inserted into his heart last year. He may need home monitoring & equipment in the future. He was on a heart bypass machine for 8hrs & long term ventilated which resulted in him having oxygen starvation to the brain. Causing development issues & Autism. So you can understand my issues. Not only for the medical impact that a mast can have. But also the disruption that having the mast constructed right next to our house & my Sons bedroom window. The noise alone will be traumatic for him. Let alone a 15m mast. I also suffer with Stress, Anxiety & PTSD from my Sons Start in life & his ongoing health issues. The stress that a giant mast is causing already is effecting me mentally & physically. This all on top of the isore right next to our house which will dominate our view from the windows & impact our garden & the wildlife. We have birds nesting in our garden. We have also had a swarm of bees that found a home in the tree on the green where the purposed site is. We are also frequented by bats in the evenings too. All in all. This is the most unsuitable site for a mast. There is research & proof that these masts cause physical, mental &

		health problems. Also proof that they can effect medication resistance. Which as you can appreciate would be detrimental to my family & would cause a major impact on my Sons health. So please please from a very worried Mother find somewhere else for it. I will be appealing to our local MP & Councillor. I am also prepared to go to the press with our case.
Julie Derham	17 COX ROW CHANDLER'S FORD EASTLEIGH SO53 3EY	Needs to be put in open space , not on a housing estate, these devices are harmful to our health !!!!
eddie stevens	33 WILTSHIRE ROAD CHANDLER'S FORD EASTLEIGH SO53 3FB	This planned 5G mast is to close to residential area, could I obtain full ICNIRP drawings and site-specific radio frequency plans so that the exclusion zone can be understood.
Carol and Graham Henery	16 BELMONT ROAD CHANDLER'S FORD EASTLEIGH SO53 3EW	We strongly object on many grounds firstly the health reasons and the serious harm these 5G masts can cause we have young grandchildren living within a few metres of this plan, we are worried for the health of the young families in this highly populated housing estate. We feel we not have the need for 5G with the increasing use of power and the harmful greenhouse gases for the environment. We can see no benefit for this and find it totally unnecessary and will be devastated if this goes ahead in an area in which our family have lived in over the past 50 years.
Katherine Henery	12 BELMONT ROAD CHANDLER'S FORD EASTLEIGH SO53 3EW	I have young children and I am very concerned with the health concerns from this proposition! I strongly object. We are also worried about the environmental damage. We have no idea why this is being proposed so close to peoples homes in a densely populated area and not on some land that isn't on any one's doorstep.
Janet Fisher	15 BELMONT ROAD CHANDLER'S FORD EASTLEIGH SO53 3EU	Harmful to wildlife when we should be conserving all things natural in an ever growing polluted planet. Environmental damage, toxic waste and the possible felling of trees to erect such equipment is abhorrent. This will also be incredibly harmful to humans health; carcinogenic, DNA alteration, neuropsychiatric, to name but a few. Nothing good and clean can come from a 5G mast installed here, there, anywhere.
Gurvinder Taak	9 COX ROW CHANDLER'S FORD EASTLEIGH SO53 3EY	Absolutely harmful for children and and adults Unacceptable
William Hazle	33 BELMONT ROAD CHANDLER'S FORD EASTLEIGH SO53 3EU	We object to this application of erecting a 5G mast in a residential area where people live and children play and our senior citizens meet at the bus stop to travel to the town centre. I cannot see why this eyesore, which is harmful to health as stated in the Lancet and the British Medical Journal , should be erected in the middle of a residential area. These 5G masts add to global greenhouse emissions . If we do have to have these eyesores they should be located in industrial areas, green field sites e..g. farm land or how about the centre of roundabouts.
Rodney Salmons	13 BELMONT ROAD CHANDLER'S FORD EASTLEIGH SO53 3EU	We do not want a 5G mast erected in the area. These masts cause considerable harm to wildlife, particularly bees. It will also contribute to the ever increasing greenhouse gas emissions. The idea that trees maybe felled is also worrying. The mast will be harmful to humans, especially children. Why should innocent children and our beloved wildlife, who are in real need of conserving , suffer at the prospect of more pollution upon more pollution. Save the Planet, save the

		wildlife, give children the chance of a cleaner, brighter, safer future.
R. Fish	14 WILTSHIRE ROAD CHANDLERS FORD EASTLEIGH SO53 3EZ	See separate letter.
